

Notes from the Alu-Timber design team...

Innovative magnetic fixing: pulls mullion and transoms together.

External aluminium for protection and timber internally for thermal performance

*Reassurance: CWCT
Tested to 3600Pa
Sequence B.*

Palette of timber species Larch, Oak, Ash.

60mm curtain walling system.

Standard profiles range allows Capped, 2 or 4sided Structural Glazing.

Alu-Timber EFT

After extensive consultation we are pleased to launch the first British 60mm timber/aluminium curtain walling system.

Alu-Timber EFT is a 60mm curtain wall system which offers capped, 2sided structural glazing with vertical or horizontal capping, and 4sided structural glazing.

Alu-Timber EFT provides thermally efficient Larch timber with time tested aluminium for protection. To maximise spans and centres, there is a wide range of aluminium mullions and transoms available. The inherent properties of timber provide two advantages: high strength as well as low U-values, ensuring our partners can meet the demands of future carbon reduction plans.
