## Alu-Timber

Merging Material Solutions  
Windows, Doors, Framing

Taking all current specification and building regulation demands into consideration, The Parkside Group Limited are pleased to launch Alu-Timber, a range of aluminium/timber windows, doors and framing, that combines sustainably grown FSC or PEFC timbers with 100% recyclable aluminium.

*"The Alu-Timber range of framing, windows and doors, merge material solutions: timber providing the thermal efficiency, aluminium the protection."*

Timber is a non-conductive material, minimising heat loss and, by using high performing glass, the lowest U-values are achievable. To protect, aluminium gives the timber facade a standard 25 year performance guarantee.

Alu-Timber gives the specifier benefits: low U-values to achieve current legislation as well as reassurance for the client that the facade will last, with minimal maintenance.

The Alu-Timber range includes casement, tilt and turn windows and an open-in and open-out door. Due to the superior jointing of Alu-Timber, it has inherently high deflection loads. Alu-Timber can therefore be used as a window walling suite up to storey height, creating modular framing systems with opening windows and doors.

Alu-Timber is a member of The Parkside Group Limited which includes Comar Architectural Aluminium Systems, Axim and is a distributor for Duco sun and ventilation products. The Parkside Group Limited offers a single source solution for all your facade requirements.

The Parkside Group Ltd, Unit 5, The Willow Centre, 17 Willow Lane, Mitcham, Surrey, CR4 4NX
